Respected Madam,

I am writing to express my interest in interviewing for the position of Python Developer. During my bachelors, I have had experience working on real time projects. I have been developing code in python from past 2 years. I have developed Django web application from scratch and deployed it on Digitalocean Ubuntu based server. I have worked on Django, Django rest framework. A Django web application developed by me was publicly accepted and have some live users.

All of this plus my ability to blend in and to work in a team is extraordinary. I think that makes me a perfect fit for your company. I look forward to discussing this job further in a skype interview.

Thanks for your consideration.

Yours sincerely,

Jagjeet Singh
